Introduction

Kevin is a result-oriented iOS Software Engineer with 7+ years of expertise in developing and maintaining quality and innovative solutions in the financial services and banking domains. His skill set includes iOS and Swift, and he has a solid understanding of iOS fundamentals, MVC and MVVM architectures, and unit testing. With hands-on experience executing projects from start to finish, he has demonstrated remarkable attention to detail in interpreting complex issues to deliver creative outcomes. Kevin is also versed in implementing third-party integrations and conducting automation testing for mobile applications. A team leader and collaborative team player, he believes in cooperation to build successful products, extraordinary experiences, and lasting value for customers.

Experience

APR 2024 - PRESENT

Safaricom Kenya, Nairobi – *Senior iOS Engineer*

- Worked on development of the new One App iOS that merges the telecom and mobile money service of the company.
- Agile methodology collaboration between the teams as well as feature driven development for each team member.
- Pull requests reviews for each team member in the squad.
- Use of jenkins pipeline for making builds both to app store and for QA/UI-UX testing.

DEC 2023 - APR 2024

Equity Bank Kenya, Nairobi – *iOS Team Lead*

- iOS project owner for our new App in development.
- Ensure all team members have all necessary information and resources to ensure steady work.
- Review pull requests from different team members.
- Ensure we have bi-weekly iOS meetings to ensure all team members are up-to-par with the rest.
- Coordinate with QA and Security when testing.

- CI/CD setup and deployments.

AUG 2022 - AUG 2023

Teya, United Kingdom - *Senior iOS Engineer*

- Building mobile applications using iOS and Android, as well as hybrid web applications in Flutter
- Maintaining retailer payment applications to ensure their stability, performance, and security
- Conducting regular updates and bug fixes to enhance the overall user experience
- Developing new payment solutions for the organization and clients, focusing on efficiency, security, and seamless integration with existing systems
- Collaborating closely with stakeholders to understand their requirements and deliver innovative solutions
- Working under the Agile methodology, participating in daily stand-ups, sprint planning, and retrospective meetings
- Cooperating with team members to prioritize tasks, allocate resources, and meet project milestones
- Actively reviewing pull requests from different team members, providing constructive feedback and ensuring code quality and best practices
- Engaging in code reviews to maintain consistency, identify potential issues, and encourage continuous improvement within the team

NOV 2019 - AUG 2022

Equity Bank Kenya, Nairobi - *Senior iOS Engineer*

- Planned and assigned tasks among the iOS team based on business priorities.
- Led the development of Equity Mobile, a digital banking application that allows users to manage their financial needs by viewing their account balances, paying bills, purchasing airtime, sending money, and more.
- Conducted in-depth research on complex topics, proactively scheduling team discussions to enhance understanding and overcome challenges effectively
- Managed the release process by delivering test and production builds, accompanied by detailed release notes, ensuring seamless testing by the QA team
- Conducted thorough code reviews of pull requests from fellow iOS team members, promoting code quality and adherence to best practices
- Provided extensive post-go-live support, addressing issues and providing solutions promptly to ensure optimal user experience following deployment

MAY 2018 - JUN 2019

Eclectics International Kenya, Nairobi - *Software Engineer*

- Designed and implemented mobile banking systems for various customers across Africa
- Devised and created database designs, normalization, and upgrade of legacy databases
- Offered post-go-live support for systems following their deployment onto the customer's servers
- Assisted with functional and business requirements processes for the mobile banking platform
- Integrated the system with APIs from different banks and telecommunications companies
- Trained employees on company products and the utilization of new systems

Education

SEP 2022 - AUG 2026

University of The People, Remote - *Degree*
Currently undertaking my bachelor's degree in computer science

MAY 2018 - NOV 2018

Moringa School - *Certification*
