October 12, 2026

Dear Hiring Manager,

I am writing to express my interest in senior mobile engineering opportunities. I bring more than eight years of experience building and supporting mobile products, with deep expertise in iOS engineering and a practical, product-minded approach to delivery.

My experience spans banking, telecommunications, and payments. At Safaricom, I first worked as a Senior iOS Engineer from April through December 2024 and continue to contribute as a contractor, building iOS experiences across telecom and mobile money services. At Equity Bank, I helped deliver Equity Mobile banking capabilities for accounts, bill payments, airtime, and transfers, and led iOS delivery for a new banking application. At Teya, I built retailer payment applications across iOS, Android, and Flutter; earlier at Eclectics International, I worked on mobile banking platforms and integrations with banks and telecommunications providers across Africa.

Alongside client and product-team work, I am a co-founder of Techna Company Limited and its mobile games studio, NovaLumina. We have shipped five mobile games for iOS and Android. Through Techna, I am also building Clarity, an agent-based contract review and negotiation-preparation product, and ForgeLab, an agent-based design-for-manufacture product. Both are currently available as previews and are pending production release.

I also contribute to open-source work across AI and iOS, including Strix, an open-source AI penetration-testing project. Building across established mobile products, independently shipped apps, and emerging AI systems has strengthened my ability to move between careful engineering execution and broader product ownership.

I would welcome the opportunity to bring that experience to your team: building reliable mobile software, helping teams deliver with confidence, and taking products from an early idea through release and continued improvement. Thank you for your consideration. I look forward to discussing how my background could support your goals.

Sincerely,
Kevin Siundu Wafula
